#### Compact End Effector:

- easy teach positioning for faster set up
- close center of mass minimizes cantilever effect
- clears part surface obstacles with less motion
- mitigates inertia effect on robot sensors
- direct faceplate mount for simple install

The cobot module comes complete with Visumatic's field-proven power bit advance, bit position sensors, and a fastener delivery confirmation sensor ensuring a repeatable joining operation.

#### Built-In Signaling Includes:

- OK to move robot
- Remote Screw Feed
- Torque Good/Bad
  - Cycle Start
- Fastener Delivered
