

VLB-900 Screwfeeder

Visumatic invented the Locking Bit for the handheld system. Our exclusive design keeps the bit and screw engaged in the nosepiece. This allows the operator to align the parts using the screw before the fastening operation.

The **Standard** Features

1. Jaw Nosepiece Assembly
2. Model 94 Automatic Screwfeeder
3. Visumatic Locking Bit
4. Microprocessor Controls
5. Model M-75 Standard Escapement Mechanism
6. Steel Enclosure.
7. Pneumatic Driver Tool
8. Optional Ergonomic Torque Arm or Bulk Supply Hoppers available

The **Advant-Edge**

9. No springs or pins to hold the nosepiece assembly together. *Built better.*
10. Most reliable & efficient feed system available. One movement, zero adjustments. *Built better.*
11. Exclusive Visumatic design keeps bit & screw engaged in the nosepiece – *the first and only.* (See reverse side of this flyer)
12. Longest blow distance on the market – greater control = greater capability.
13. Eliminates debris - extremely quiet.
14. Handheld systems use your brand of pneumatic, AC or DC electric, lever, trigger, push-to-start, pistol or inline tools—you decide.
